-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mangold et al. (U.S. patent 4,425,481).

Regarding claim 26, Mangold teaches a system that comprises a hearing device (col. 1, lines 5-6), an input unit (1, figures 1, 2) including input means to generate information for both an automatic adjustment of parameters and manual adjustment of parameters of a parameter set of the hearing device including at least one parameter other than volume as claimed (col. 3, lines 6-11 and col. 5, lines 1-21), and transmission means (2, 6) to transmit the information to the hearing device.

Mangold does not specifically disclose the adjustment of the parameters that is performed in the sense of "better understanding" or "more pleasant hearing" as claimed. However,

Art Unit: 2615

Mangold does teach that a number of different signal processes can easily be selected to suit different sound situations (see the abstract and col. 4, lines 24-31).

Therefore, it would have been obvious to one skilled in the art to provide the adjustment of the parameters in the Mangold hearing aid device that is performed in any different sound situations such as in the sense of “better understanding” or “more pleasant understanding” for better suiting different sound environment conditions.

3. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mangold et al. (U.S. patent 4,425,481) in view of Brillhart et al. (U.S. patent 5,303,306).

Mangold does not specifically teach a transmission means (2, 6) as claimed. However, providing the transmission means (the external programming unit 2) to be capable of wirelessly transmitting the information to the hearing device is known in the art.

Brillhart teaches a transmission means to be used as a remote control (20, figure 1).

Therefore, it would have been obvious to one skilled in the art to provide the transmission means (the external programming device 2) of Mangold to be capable of wirelessly transmitting the information to the hearing device, as taught by Brillhart for better adjusting the parameters of the parameter set of the hearing aid.

Allowable Subject Matter

4. Claims 1-25 have been allowed.
